

inOVISION

the ultimate addition to your website

“bringing remote
reality to the desktop”

The inovation viewer

[view stunning 360° panoramas](#)

Delivering and viewing active content online has never been so easy with Inovation's unique technology. We offer the most content rich facility on the internet by combining and delivering all popular forms of active content in one seamless viewer.

Clients are able to include intelligent streaming video, 360° panoramic images, high definition still photographs, streaming audio and promotional editorial. All this multi-media can be fully integrated into your website using a simple button or link on your preferred webpage. A visitor to your site then clicks on this button and they can instantly view the content of your interactive presentation as part of your website. The best thing is, there is no disruption or dismantling of your website and all your active content is contained in one highly efficient presentation that is transparently delivered from our own high speed servers. It couldn't be simpler!

Our network of expert re-sellers can photograph your premises, venue or location and then construct your 360° multi-media presentation in minutes, ready for installation in your website.

- ▶ Delivering and viewing active content online is now as simple as the click of a button.
- ▶ Reach audiences that traditional marketing methods never could and at a fraction of the cost.
- ▶ Draw people into your website instantly and keep them there longer.
- ▶ Virtually all popular forms of active content in one seamless, high quality viewer including: streaming video, 360° panoramic images, high definition still photographs, streaming audio and promotional editorial.
- ▶ No need to download cumbersome and long winded “plug-ins” before viewing our presentations. This means that upwards of 96% of the internet audience can instantly view an Inovation presentation as soon as they click on the activation button within a client's website.
- ▶ Our presentations are statistically proven to keep your visitors on your site longer and passively direct your audience to further investigate your website in its entirety. As Each presentation is tracked for performance by our active statistical module, you will find out where your visitors have come from, how far they have “drilled down” into your presentation and the total time spent viewing the presentation... *plus much, much more.*

The inovision builder

The technology we've developed lets both the novice and the expert affordably construct, deliver and display superior visual content - all at the click of a button.

Providing the leading content delivery solution is only one part of our technology. The tools that are used to create one of our presentations are now available completely online. The active content builder allows our resellers to build a complete presentation and deliver amazing interactive content at the click of a button. A presentation can be simply constructed using just a browser and an internet connection. This can all be done without any reliance on software being installed on the local machine.

upload 360° panoramic content and digital stills at the click of a button.

add streaming video and audio to any presentation

- ▶ A total active content solution that offers unparalleled functionality and ease of implementation.
- ▶ Each element of the presentation can be totally customised and any changes made can be reviewed on-the-fly during construction.
- ▶ All the tools needed to create the presentation are available completely online.
- ▶ No additional software is needed on the client computer.
- ▶ Our dynamic technology means that changes can be made at any time without disrupting the live presentation or the client's website.
- ▶ We provide the most advanced service available without the cost of highly skilled personnel or intensive training.
- ▶ Because our system provides global access, it offers our resellers opportunities to develop new markets and increased revenue streams.

inovision company overview
